

THE PAPER ESCAPER

by GITA BEZARD

TERRAPIN

DRAWING & INVENTION WORKSHEET

PROSTHESIS INVENTIONS

When Benny loses their leg in The Paper Escaper, Karta makes them a wheel to help move around the workshop. Karta also makes Benny a special claw glove which is very useful to get in and out of the trapdoors and for creating new things. These are examples of a prosthesis, which is an artificial device that replaces a missing body part.

As a class, brainstorm some ideas of what else could be a useful prosthesis for a missing leg or arm or gadget ideas that could make it easier to do different jobs.

Students can then design their own prosthesis and/or gadget for Benny using the worksheet.

Materials:

- Printed copies of worksheet
- Pencils, markers, crayons
- Small craft bits and pieces: cardboard, pipe cleaners, straws, buttons, paperclips...
- Glue
- Scissors

We would love for you to send through your finished artworks! Email images to:
